พริบตา คลินิก

Doctor: นพ.นิพัทธ์ ธีรตกุลพิศาล

Sex: F HN: P21-10621

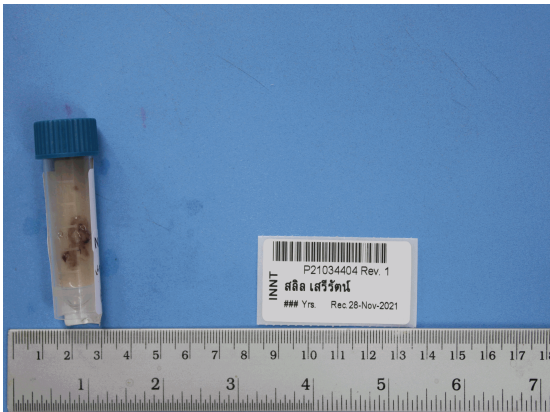

Ward/Clinic: Collected Date: 27-Nov-2021

Received Date: 28-Nov-2021 Reported Date: 04-Dec-2021

Sample: Cervical polyp, polypectomy

Report Type: Completed Report

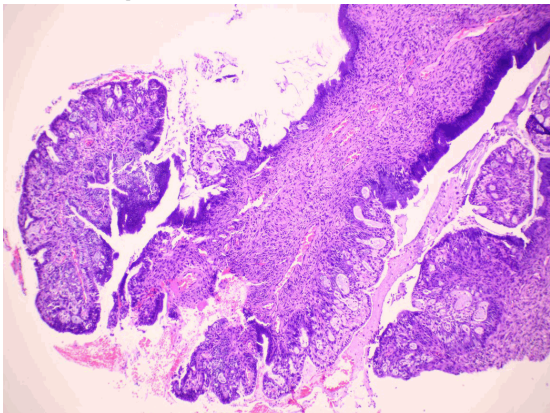

Gross Examination:

The specimen is received in formalin, labeled with the patient's demographic data, an accession number and additional labeling "endocervical polyp". It consists of two pieces of soft irregular light brown tissue with mucous, measuring 0.5x0.3x0.3 and 0.9x0.7x0.4 cm.

Entirely submitted as A01 (II)

Microscopic Examination:

The section shows polypoid tissue covered by columnar epithelium of endocervical epithelium with foci of squamous metaplasia. There are thick wall blood vessels embedded in congested stroma. No malignancy is seen.

Diagnosis Description:

Cervical polyp, polypectomy:

- Endocervical polyp
