Doctor: นพ.นิพัทธ์

Age: 38 Y Sex: F HN: P21-07206

Ward/Clinic: Collected Date: 06-Sep-2021

Received Date: 07-Sep-2021 Reported Date: 10-Sep-2021

**Sample: Cervix, biopsy**

**Report Type: Completed Report**

## Gross Examination:

I. Received in formalin, labeled with the patient's demographic data, and additional labeling as "cervical biopsy at 12 o'clock", consists of a piece of irregular soft gray white tissue, measuring 0.4x0.4x0.3 cm. It is entirely submitted as A01.

II. Received in formalin, labeled with the patient's demographic data, and additional labeling as "cervical biopsy at 6 o'clock", consists of a piece of irregular soft gray white tissue, measuring 0.4x0.3x0.3 cm. It is entirely submitted as B01.

## Microscopic Examination:

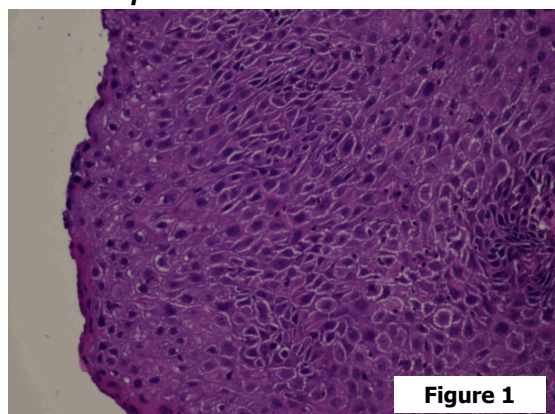

Figure 1

I. Sections reveal fragments of unremarkable ectocervical tissue with bland nuclei (figure 1). Neither dysplasia or malignancy is seen.

II. Sections reveal papillary growth of ectocervical epithelium with fibrovascular core and parakeratosis (figure 2). These cells possess perinuclear halo with enlarged, hyperchromatic nuclei. No dysplasia is seen. No malignancy is seen.

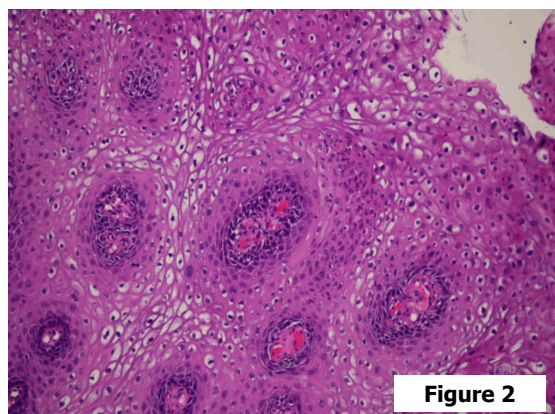

Figure 2

**Patho No. : P21024581**

**Hospital Lab No. : N/A**
